REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The amendment to Claim 1 requires a block copolymer which forms a hydrogel by sol-gel transition in accordance with a change in temperature and pH. As illustrated by the Applicant's arguments, Han's copolymers undergo a transition between micelle aggregation and segregation in response to a change in pH, rather than a sol-gel transition. This is shown, for example, in the figures on page 8 of the Applicant's remarks, and is more clearly illustrated by the figure which appears on page 9. The phenomenon is also described on page 58, col. 1, paragraph 2 of Han.
3. Additionally, the cited article to Shim et al included with the Applicant's remarks provides evidence that Huang's copolymers do not undergo a sol-gel transition in response to changes in pH and temperature as per the instant claims. See, for example, p. 1939, Figure 5 of Shim, also reproduced on page 10 of the Applicant's remarks. Shim works with copolymers identical to those taught by Huang.
4. Thus, it is evident that Han and Huang exhibit far different characteristics in response to changes in pH and temperature. Han's copolymers are specifically designed to exhibit a desired effect based on small changes in pH that occur when transitioning from normal tissue (pH=7.4) and tumors (pH=7.0). Based on the results presented by each reference, it is clear that modification of Han in view of Huang would cause Han's copolymers to cease functioning as intended. Furthermore, based on the results presented by both references and also on the results presented by Shim et al,

Art Unit: 1796

neither reference provides any indication or expectation that modification of Han in view of Huang would result in a block copolymer which forms a hydrogel by sol-gel transition in accordance with a change in both temperature and pH.

5. In light of the Applicant's arguments, Claim 1 is allowable over the prior art to Han and Huang. The remaining claims 2-6 and 8-16 each require the block copolymer of Claim 1, and are therefore also allowable.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
